## 背景

### ◎ GPSC 及其区域城市学院

全球可持续城市平台（GPSC）由世界银行牵头，全球环境基金（GEF）资助，是一个连接城市和合作伙伴的全球跨学科知识平台。该平台通过提供专业技术支持、创新工具及协同合作平台，助力城市应对快速城镇化与气候变化带来的复杂挑战。作为 GPSC 的核心常规项目，区域城市学院旨在提升城市决策者与实践者的综合能力。该项目采用模块化教学模式，为参与者提供可持续城市发展管理工具，促进国际先进经验交流，搭建全球专家互动网络，并协助制定城市诊断报告与可实施行动计划，系统性优化城市发展效能。

### ◎首次 GPSC 区域城市学院活动 - 亚洲区域城市学院

快速的城市化为亚洲城市发展带来了机遇与挑战，亚洲各地城市面临着气候风险、洪涝灾害、资源限制等挑战，正在积极探索韧性、低碳发展的转型之路。本期亚洲区域城市学院活动将重点关注亚洲城市发展的独特需求，为城市提供交流合作平台，分享经验并共同制定韧性、低碳和包容性发展的城市规划战略。

**该活动由世界银行 - 全球可持续城市平台 (GPSC) 和中国城市和小城镇改革发展中心 (CCUD) 联合举办，广州市规划和自然资源局协办，广州市城市规划勘测设计研究院有限公司（GZPI）支持，将于 2025 年 5 月 12 日至 14 日与世界银行 Infra4Dev 会议同期在广州举行。**

广州市通过建设蓝绿基础设施提升城市韧性，推行海绵城市行动治理内涝，展示了城市可持续发展实景解决方案，其创新实践为其他城市提供示范。

### ◎期望与承诺

城市学院活动旨在提供一个互动平台，就选定主题进行学习和交流。各参会城市需提前做好准备，在专题研讨环节积极分享本地的实践成果与经验。在深入学习环节之前，我们将向每个参与城市提供背景材料。

## 主要主题和议题概述

### 主题一： 明日蓝图 – 城市韧性规划

亚洲城市正面临日益加剧的气候风险、资源约束和快速城镇化挑战。城市规划在将韧性和可持续性融入土地利用规划和城市发展战略方面发挥着关键作用。本次会议旨在探讨将城市扩张与气候适应和脱碳目标相结合的关键框架、政策工具和规划方法。关键主题包括：

- 土地利用规划——将城市发展、经济发展、低碳和韧性纳入总体规划和长期城市发展战略
- 气候智慧型城市发展工具——情景规划、风险评估和政策工具
- 机构协调——促进跨部门气候行动合作

### 主题二： 城市中的自然——建设绿色和蓝色基础设施，增强城市韧性

基于自然的解决方案能提供经济有效的方法来增强城市韧性、降低气候风险和改善宜居性。本主题重点关注城市如何整合绿色和蓝色基础设施，例如用于洪水管理的海绵城市建设、用于管理城市热量的被动解决方案以及用于增强城市生物多样性的绿色走廊。参与者将探索实用工具、融资机制和治理结构，使城市能够利用自然实现可持续发展。关键主题包括：

- 海绵城市——设计构建吸水、蓄水、净水、用水的弹性水循环系统
- 用于管理城市热量的蓝绿基础设施——城市降温、社区更新等案例研究
- 城市生物多样性绿色走廊
- 政策与金融创新——将基于自然的解决方案融入城市投资

这两大主题将融入为期三天的活动以及 Infra4Development 联合会议中。

## BACKGROUND

### GPSC and its Regional City Academy

The Global Platform for Sustainable Cities (GPSC), led by the World Bank and funded by the Global Environment Facility (GEF), serves as a global knowledge platform that connects cities and partners across disciplines. It provides technical expertise, innovative tools, and a convening space for cities to tackle complex challenges arising from rapid urbanization and climate change. The Regional City Academy is a core initiative of the GPSC, conducted on a regular basis, to strengthen the operational capacity of city leaders and urban practitioners. This learning program offers practical training modules to equip participants with tools for managing sustainable urban development. It fosters the exchange of best practices, enables interactions with global experts, and supports participants in creating diagnostic reports and actionable plans to enhance urban performance.

### GPSC First Regional City Academy – Asia

The upcoming Regional City Academy will focus on the unique needs of Asian cities, where rapid urbanization has presented opportunities and challenges. Cities across Asia face significant climate risks, urban flooding, and resource constraints, while also striving to transition toward low-carbon and resilient growth. This Academy will provide a platform for city leaders to share experiences and co-develop strategies for achieving resilient, low-carbon, and inclusive urban development.

Guangzhou, one of China’s leading megacities, exemplifies innovative urban practices, such as building green and blue infrastructure to enhance urban resilience and sponge city initiatives for flood management, making it an ideal venue to showcase real-world solutions for sustainable urban growth. **The Academy is jointly organized by the GPSC and China Center for Urban Development (CCUD) in collaboration with the Guangzhou Municipal Planning and Natural Resources Bureau with the support of Guangzhou Urban Planning and Survey Research Institute (GZPI).** The Academy will take place in Guangzhou, China, from May 12–14, 2025, in conjunction with the World Bank’s Infra4Dev Conference.

### Expectation and Commitment

The City Academy is designed to provide an interactive forum for learning and exchanging ideas on the selected topic. Each participating city should be prepared to actively share its work and experiences with peer cities throughout the deep dive learning session. Background materials will be provided to each participating city before the deep dive learning session.

## OVERVIEW OF KEY THEMES AND TOPICS

### Theme 1:

#### Blueprint for Tomorrow – Planning for Urban Resilience

Cities in Asia are facing increasing climate risks, resource constraints, and rapid urban growth. Urban planning plays a pivotal role in integrating resilience and sustainability into land use planning and city development strategies. This session explores key frameworks, policy tools, and planning approaches that help cities align urban expansion with climate adaptation and decarbonization goals. The key topics are:

- Strategic land use planning – embedding urban growth, economic development, low carbon, and resilience into master plan and long-term city growth strategy
- Tools for climate-smart urban development – scenario planning, risk assessment, and policy instruments
- Institutional coordination – fostering cross-sector collaboration for climate action

### Theme 2:

#### Nature in the City – Building Green and Blue Infrastructure to Enhance urban resilience

Nature-based solutions offer cost-effective ways to enhance urban resilience, reduce climate risks, and improve livability. This theme focuses on how cities can integrate green and blue infrastructure, such as sponge city initiatives for flood management, passive solutions for managing urban heat, and green corridors for enhancing urban biodiversity. Participants will explore practical tools, financing mechanisms, and governance structures that enable cities to harness nature for sustainable urban growth. The key topics are:

- Sponge city principles – designing cities that absorb, store, and reuse water
- Green-blue infrastructure for managing urban heat – case studies on urban cooling, including neighborhood regeneration
- Green corridors for urban biodiversity
- Policy and financial enablers – integrating nature-based solutions into urban investments

These two themes are integrated into four sessions of the three-day academy, including a joint session with the participants from Infra4Development.
