

# GEF-6 Target Contributions to Global Environmental Benefits (\$4.4 billion)

Results	Targets
1. Maintain globally significant <b>biodiversity</b> and the <b>ecosystem</b> goods and services	<ul style="list-style-type: none"> <li>• <b>300 million hectares</b></li> </ul>
2. Sustainable <b>land</b> management in production systems (agriculture, rangelands, and forest landscapes)	<ul style="list-style-type: none"> <li>• <b>120 million hectares</b></li> </ul>
3. <b>water systems</b>	<ul style="list-style-type: none"> <li>• <b>10 freshwater basins;</b></li> <li>• <b>20%</b> of globally over-exploited fisheries moved to more sustainable levels</li> </ul>
4. GHG emissions mitigated	<ul style="list-style-type: none"> <li>• <b>750 million tons</b></li> </ul>
5. Increase in phase-out, disposal and reduction of releases of <b>POPs, ODS, mercury</b> and other chemicals of global concern	<ul style="list-style-type: none"> <li>• Disposal of <b>80,000 tons of POPs</b></li> <li>• Reduction of <b>1000 tons of mercury</b></li> <li>• Phase-out of <b>303.44 tons of ODP</b></li> </ul>
6. Enhanced capacity of countries to implement MEAs and mainstream into national and sub-national policy, planning financial and legal frameworks	<ul style="list-style-type: none"> <li>• Development and sectoral planning frameworks integrate measurable targets drawn from the MEAs in at least <b>10 countries</b></li> <li>• Functional environmental info systems are established to support decision-making in at least <b>10 countries</b></li> </ul>

# GEF-7 Target Contributions to Global Environmental Benefits (\$4.4 billion scenario)

Results	Targets
1. Terrestrial protected areas	• 217 million hectares
2. Landscapes under improved practices	• 350 million hectares
3. Total area under improved management	• 614 million hectares
4. GHG mitigated	• 1,723 million tons
5. Reduction and elimination of chemicals	• 108 thousand metric tons
