

"Valuable and Insightful"

Palembang

Comments:

We get **enlightenment** from sharing the experiences from cities around the globe. Detailed long-term planning can create a better urban environment that is friendly to nature

Balikpapan

Comments:

The concept of ecological planning is quite similar to what we want to implement. Added up with the practice and result of the implementation can be used as a **good reference** for us. The **interpretation facility also helps us a lot**, the only **minor shortcoming is the time**, most Indonesian were breakfasting/ praying at this time

Comments:

It's an amazing experience to get information about nature solution-based city planning. A well-planned city planning produces a cool and beautiful city by creating a complete green infrastructure accompanied by corridors that make a great city with all the existing stakeholders.

Bitung

Comments:

Very insightful because speakers present real results of the implemented strategies hence gave us inspiration for alternative choices of innovation and solutions to be adapted to the conditions of Jakarta. We would also like examples of implementation in developing countries and community based projects. The existence of interpreter also very helpful. However, the time that is held coincides with the time of worship for Muslims in the month of Ramadan

DKI Jakarta

Semarang

Comments:

Overall the event was **good and interesting** because we could see and learn more about green development concepts in various countries. It gave wider insight in planning for a more comfortable and sustainable city development
