DANMARKS GRØNNE TÆNKETANK

DK2020 → The Climate Alliance

Cities Program

Our work

- Fostering ambitious CAPs in all Danish municipalities
- Nature-based thinking in creating resilient and livable cities
- New report – 5 principles guiding nature-based cities;
 1. Recognizing the value of nature for both people and ecosystems.
 2. Working systemically and strategically with nature in urban planning and development.
 3. Prioritizing an inclusive and locally supported urban development.
 4. Ensuring capacity building at all levels.
 5. Working across sectors and disciplines for climate-resilient cities.
