BENEFITS OF CLIMATE ACTION

What is a benefit
Why measuring the benefits

BENEFITS OF CLIMATE ACTION

Impacts and benefits

Every climate action has an impact

IMPACT

Generic term for positive or negative impacts of an action.

BENEFIT

When you have current evidence that its clearly a positive impact.

BENEFITS OF CLIMATE ACTION

Why measuring the benefits is important

Cities need to take urgent climate action

The fierce of climate urgency. By 2020 – C40 cities must:

- Double the rate of action
- Ensure 70% of action are at city-scale

Public Health & Economic challenges:

- Poor air quality
- Cities growth
- Inequality of access to healthcare

BENEFITS OF CLIMATE ACTION

Why measuring the benefits is important

Making the case is a key barrier – Cities face challenges to delivering and expanding climate action

CITIES CHALLENGES

- Political will
- Lack of funding
- Public reluctance
- Engagement of stakeholders
- Lack of clear targets
- Lack of knowledge
- ...

WHY INVESTING IN CLIMATE
ACTION?

BENEFITS OF CLIMATE ACTION

Understanding the Benefits approach

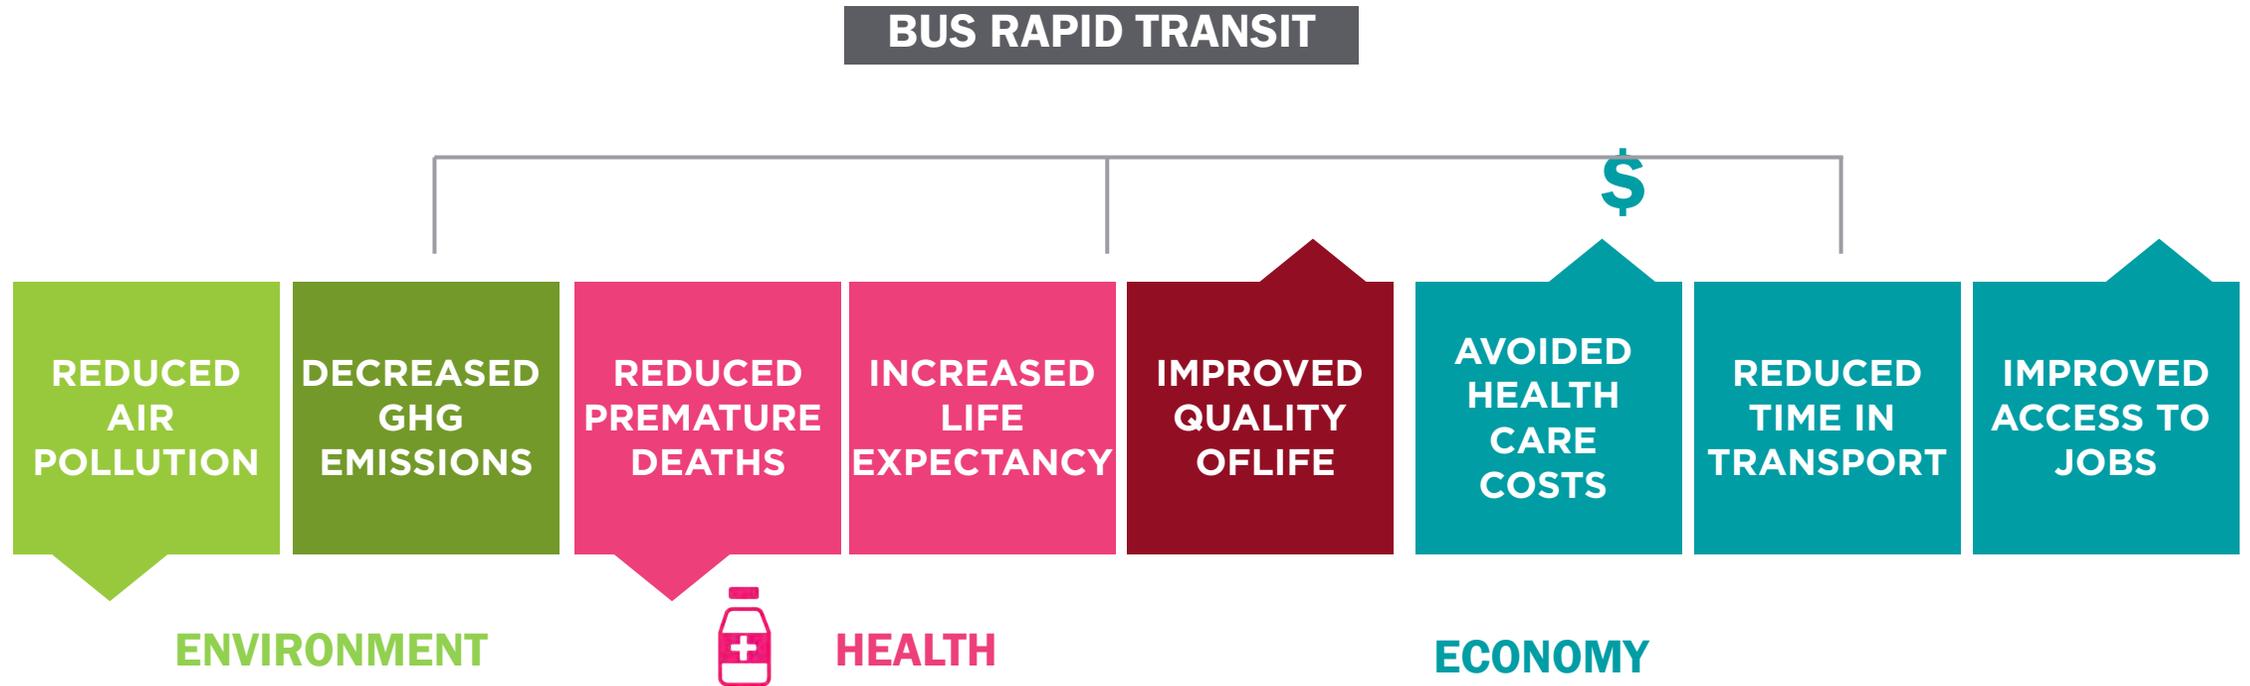

Synergy to address the city's challenges

BENEFITS OF CLIMATE ACTION

Understanding the Benefits approach

Climate Action can bring a range of wider benefits

2. First two questions to be addressed

1. What benefits can be measured now, based on the data currently available in cities and feasible methods of analysis?
2. How can gaps in data and research be filled and what methods can be employed to improve the measurement of benefits in the future?

02.

HOW THE BENEFITS APPROACH CAN UNLOCK ACTION

Examples of cities who successfully used the Benefits approach.

HOW THE BENEFITS APPROACH CAN UNLOCK ACTION

Example : Quito electric buses

380 PREMATURE DEATHS
EACH YEAR IN QUITO ARE DUE
TO PM_{2.5} LEVELS

BUSES REPRESENT 31% OF
ROAD TRANSPORT SECTOR
PM_{2.5} CONCENTRATION

11.4%
reduction
PM_{2.5} in the
intervention
area

6.5
premature
deaths
avoided per
year

3 days
increase in
life
expectancy

7.3
avoided
hospital
admissions
per year

6,500\$
avoided
healthcare
costs

THE PROBLEM

THE ACTION: REPLACING BUSES
BY ELECTRIC ONES

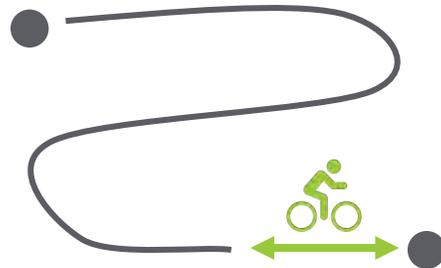

THE BENEFITS

HOW THE BENEFITS APPROACH CAN UNLOCK ACTION

Example : Mexico Walking & Cycling facilities

MASSIVE BIKE PARKING FACILITIES

First and Last mile

15 minutes

2 times on week days

TRIPS CHARACTERISTICS

HEALTH BENEFITS PER USER

03.

MEASURING THE BENEFITS

Tools available with C40

MEASURING THE BENEFITS

Walking & Cycling Benefits – Tool available

HEALTH BENEFITS

- Cardiovascular & Respiratory diseases reduction
- Type II Diabetes reduction
- Depression, Dementia reduction
- Cancer (Colon, Breast) reduction
- Increased life expectancy and premature death avoided

GHG EMISSIONS REDUCTION

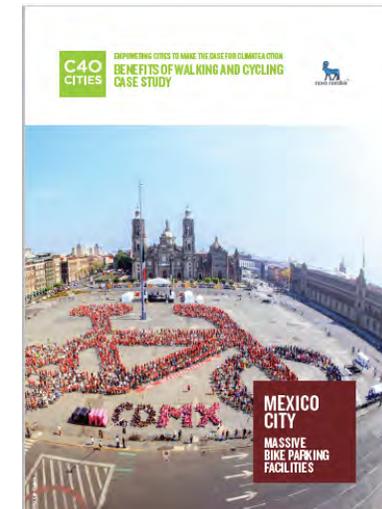

ECONOMIC BENEFITS

- Economic value of premature death avoided (VOLY/VSL)

& FAQ**

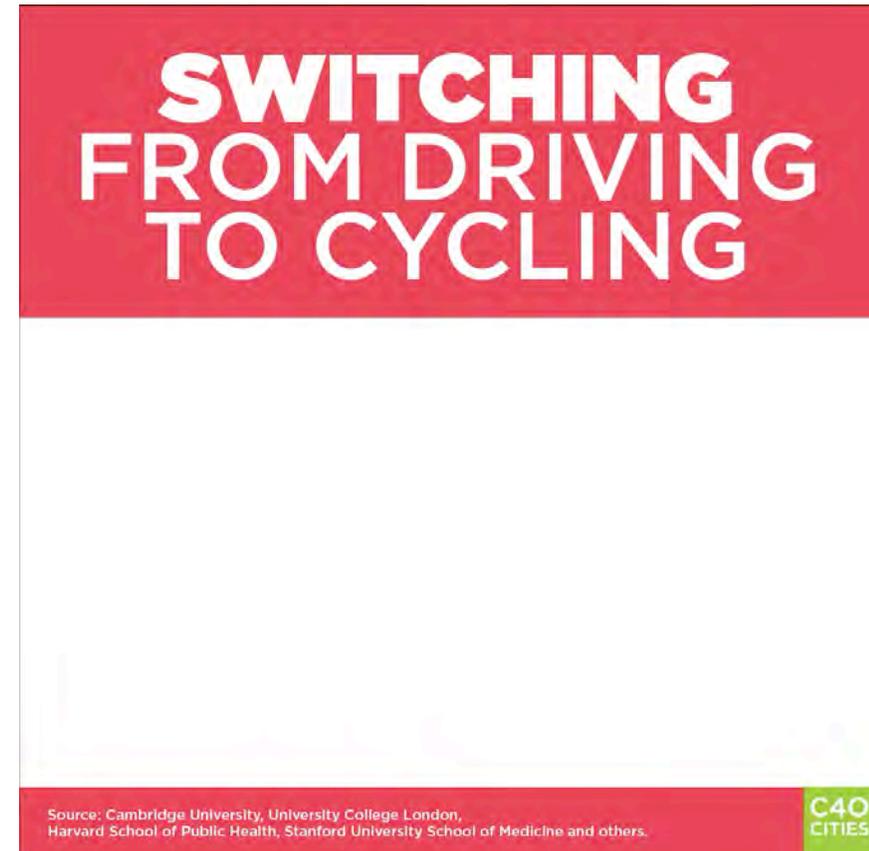

MEASURING THE BENEFITS

Walking and Cycling : health benefits of active mobility general results

Switching from driving to an active commute (walking at a brisk pace or cycling 30 minutes per day, 5 days a week) can deliver the following health benefits for citizens:

- 23% reduced risk of heart disease,
- 23% reduced risk of stroke,
- 15% reduced risk of type 2 diabetes,
- 14% reduced risk of depression,
- 12% reduced risk of breast cancer
- 11% reduced risk of dementia, and
- 8% reduced risk of colon cancer

04.

CASE STUDY: MEDELLIN-CONTEXT

Third stage: Action and Plan development

TRADITIONAL
APPROACH

Measure/action: “To modernize and increase the electric public transport vehicles fleet”

Term: undefined.

Target: undefined.

NEW APPROACH: ALIGNED
WITH THE PARIS AGREEMENT

Measure: “To modernize and increase the electric public transport vehicles fleet”

Action: percentage of electric buses

Term: 2023, 2030 and 2050.

Target: 5%, 24% and 100% respectively.

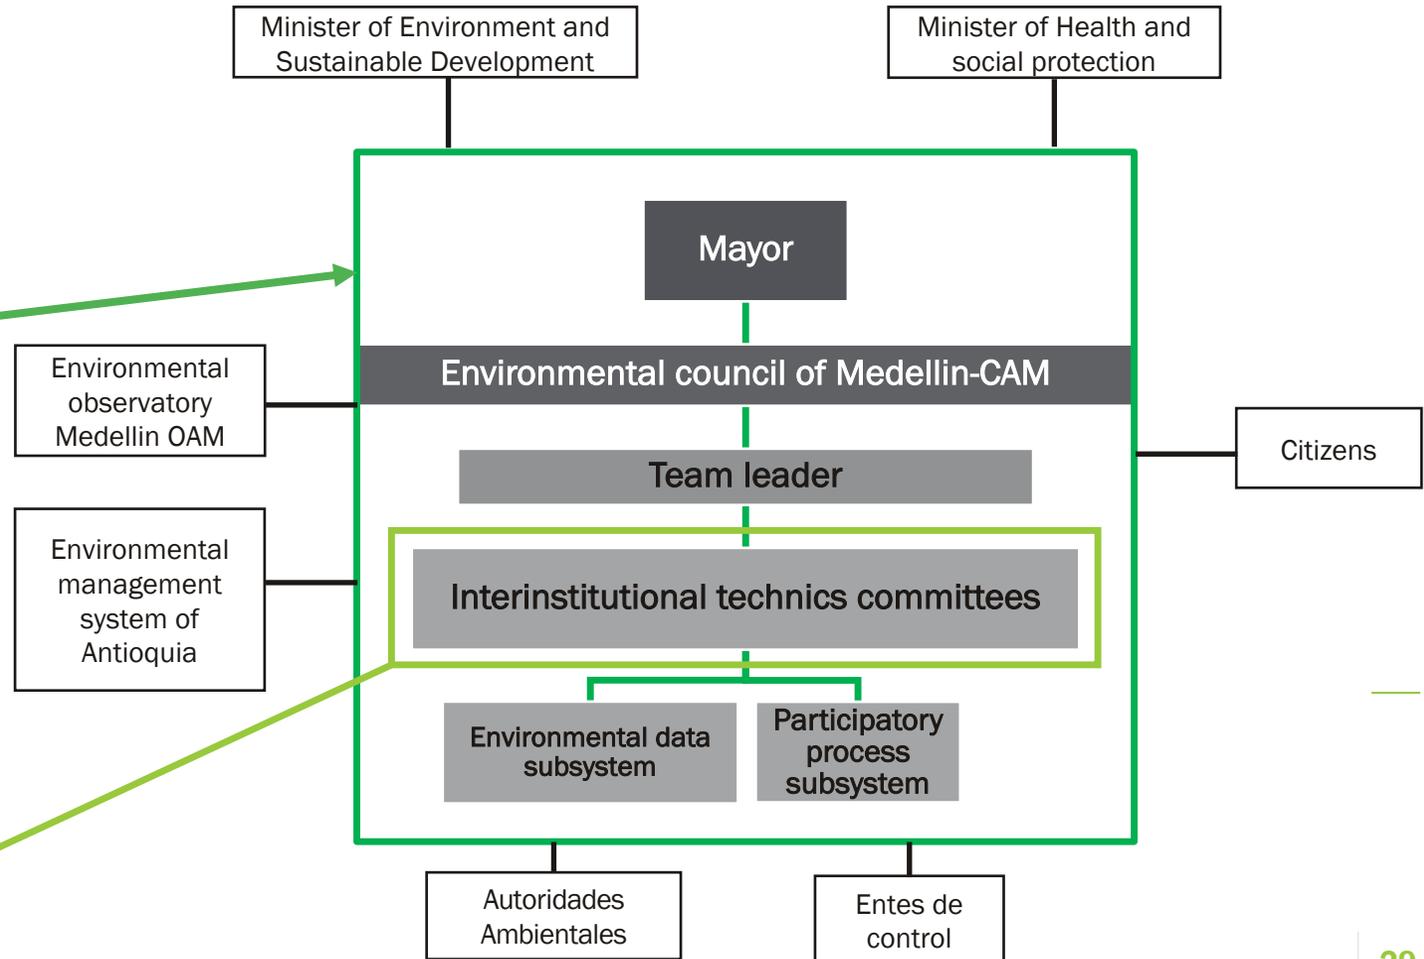

CASE STUDY: MEDELLIN-CONTEXT

Third stage: Action and Plan development

Governance structure behind the CAP

Air quality as a driver

During March and October the city experiences an Air Quality Crisis

THEME	IMPACT GROUP	IMPACT (examples)	SPECIFIC GROUP (examples)	INDICATORS (examples)
SOCIAL	Health	Physical health	Health hazards and death	Life expectancy at birth
			Disability	Disability adjusted life years
			Physical activity	Share of time spent doing physical activity
	Quality of life and urban liveability	Mental health	Stress	Suicide rate
			Dementia	Incidence of dementia
			Housing	Housing affordability
Housing quality	Living area per household			
ECONOMIC	Wealth and economy	Economic prosperity	Economic production	Total city income (GDP)
			Labour productivity	GDP per job
		Employment	Employment figures	Unemployment rate
			Job quality	Earnings quality
		Economic innovation	Innovation	Number of patents created
			Local sector development	Number of start-ups
ENVIRONMENTAL	Environmental quality	Biodiversity	Biodiversity protection	Proportion of natural areas under protection
			Ecosystem services	Daily volume of natural freshwater extracted
		Air quality	Indoor pollution	Types of cooking fuels used
			Outdoor air pollution	Number of days above WHO pollutants recommendations
		Noise	Indoor noise	Indoor noise levels (dB)
			Outdoor noise	Noise level from traffic (dB)

AIR QUALITY BENEFITS-MEDELLIN

Vehicles fleet

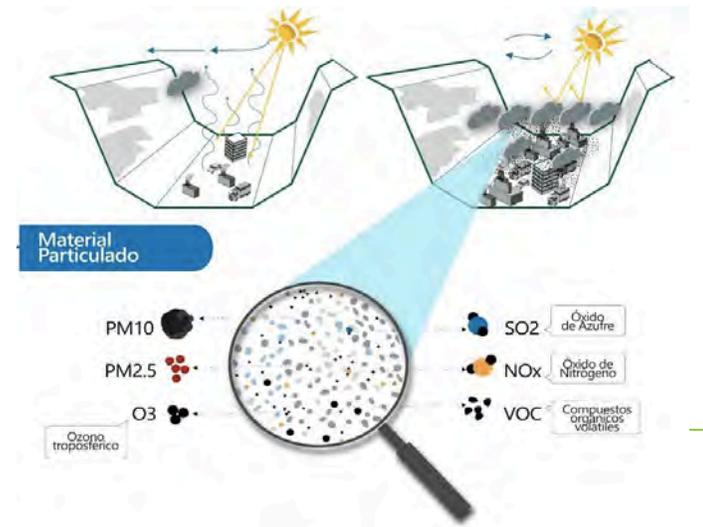

Making the case is a key barrier – Cities face challenges to delivering and expanding climate action

AIR QUALITY BENEFITS-MEDELLIN

Air quality as a driver to act

A driver to overcome city's challenges to delivering and expanding climate action

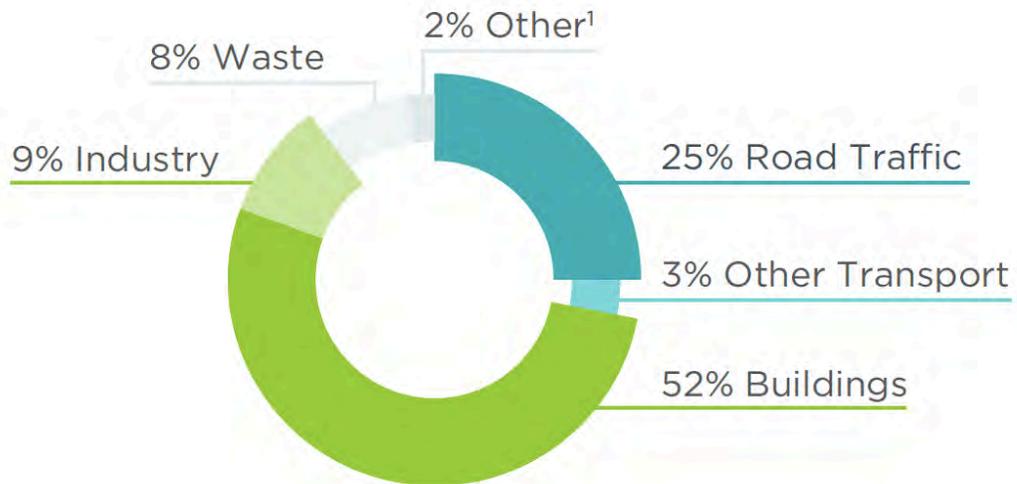

AIR QUALITY BENEFITS-MEDELLIN

Global climate and air quality

Making the case is a key barrier – Cities face challenges to delivering and expanding climate action

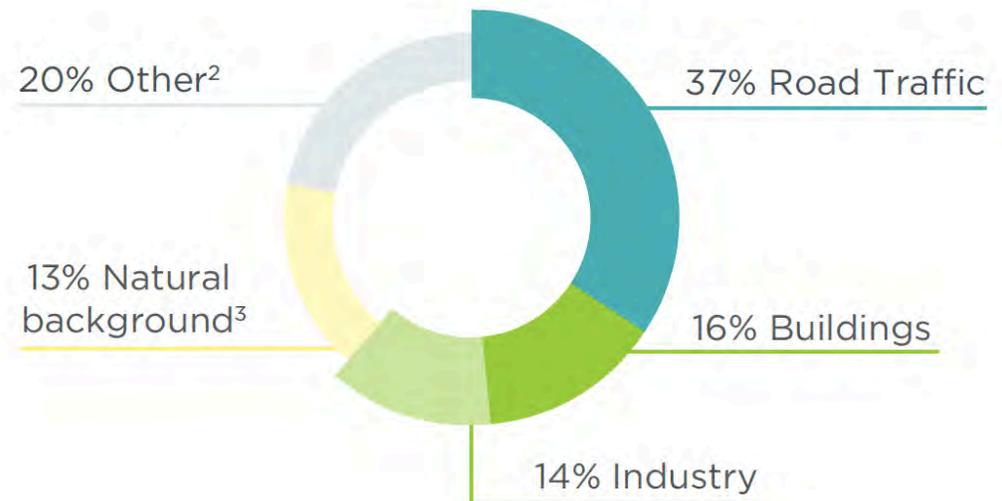

CLIMATE CHANGE

Sources of GHG Emissions

AIR POLLUTION

Sources of PM_{2.5} Concentration

¹ Agriculture, forestry and fishing activities ² Unspecified sources of human origins ³ Soil dust and sea salt

GHG source apportionment takes into account Scope 1 (not including energy generation) and 2 emissions, while PM_{2.5} considers Scope 1 only. See methodology report for details.

AIR QUALITY BENEFITS-MEDELLIN

Global climate and air quality

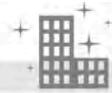

Connecting the dots between climate action and improved air quality

CLEAN INDUSTRY

ALL-CITY ACTIONS

- Industrial operational improvements and energy efficient technologies
- Emissions capture
- Fugitive emissions control
- Maintenance and monitoring

CLEAN BUILDINGS

ALL-CITY ACTIONS

- Stringent standards for new buildings
- Retrofit envelope
- HVAC and water heating
- Lighting, automation and controls

CLEAN TRANSPORT

ALL-CITY ACTIONS

- Walking, cycling and mass transit
- Transit-oriented development
- Emission standards
- Zero tailpipe-emission vehicles
- Freight optimisation
- Zero emission area
