DEVELOPMENT INCENTIVES

A guide of financing tools for planners and economic development specialists

Type: Reference Document
INTRODUCTION

Since TOD is a deviation from traditional single use development models, incentives are often used to attract developers and investors in developing the TOD area, especially in the case of peripheral areas of the city or greenfield contexts. Some incentives are also aligned towards the citizens, encouraging heightened community participation in the development process. This helps in ensuring that the project is co-created with impacted stakeholders, and chances of delays in obtaining project approvals and implementation are minimized. The following outlines the potential development incentives that can be implemented:

<table>
<thead>
<tr>
<th>INCENTIVE</th>
<th>OUTCOME</th>
</tr>
</thead>
<tbody>
<tr>
<td>Increased densities offered by-right around transit nodes, as well as density bonuses in exchange for public amenities and infrastructure constructed by private sector, subject to market demand.</td>
<td>Conducive to development and reduce infrastructure expansion costs</td>
</tr>
<tr>
<td>Local Growth Management Strategies and incentives to promote TOD to land developers and investors at the local level.</td>
<td>Provides better urban planning and growth guidelines, thereby increasing the attractiveness potential of the area</td>
</tr>
<tr>
<td>Incentives to developers in the form of technical assistance for architectural design, site plan approval, understanding zoning regulations.</td>
<td>Resulting in quality development</td>
</tr>
<tr>
<td>Incentive to developers by relaxing height restrictions and reducing the requirement for providing car parking. These may be justified where the development is located near shops and close to public transport, as envisaged in TOD, depending on market demand.</td>
<td>Opportunity for mixed-use, compact development</td>
</tr>
<tr>
<td>For projects with a strong focus on transit use, incentives can include full or partial fee rebate on development application fees.</td>
<td>Reduces processing time and improves efficiency</td>
</tr>
<tr>
<td>Financial assistance for activities such as organizing initial community consultation and integrating affordable housing and community facilities as part of the TOD project.</td>
<td>Participatory planning</td>
</tr>
<tr>
<td>Incentives such as fee waivers, expedited processing of development applications to streamline approval process.</td>
<td>Value addition to the service improves project delivery</td>
</tr>
</tbody>
</table>
MODIFY MAXIMUM BUILDING HEIGHT
Increased allowable height may vary depending on the current zoning and the location in relation to transit nodes, but would increase buildable area.

MODIFY MAXIMUM LOT COVERAGE
Increased maximum lot coverage may vary depending on the current zoning and the location in relation to transit nodes, but would increase buildable area.

MODIFY ALLOWABLE RESIDENTIAL DENSITY
Decreasing the required land area per dwelling unit creates an opportunity for increased housing density near transit and more housing flexibility and choice.
MODIFY PERMITTED USES
Amending principal permitted uses, to include a full range of residential and commercial uses within a walkable distance of transit, reinforces pedestrian activity.

INCENTIVIZE MIXED USES
Requiring or incentivizing a mix of uses increases the opportunity for a vibrant place that contributes to active and walkable transit.

INCENTIVIZE RESIDENTIAL CONVERSION
Incentivizing existing structures to convert to residential uses would enable more contiguous, walkable districts to occur near transit stations.
INCENTIVIZE SPECIFIC DESIRED USES
Providing additional height or density entitlements to specific uses, in specific locations, creates the opportunity to align private and public investments.

INCENTIVIZE SPECIFIC DESIRED USES
Incentivizing parcel assembly creates new opportunities for larger scale redevelopment where desirable.

INCENTIVIZE HOUSING CHOICE / OPPORTUNITY
Variation in housing opportunities strengthens compact, walkable neighbourhoods and builds upon the strengths of residential demand.
PARKING INCENTIVES

DEFINING PARKING LOCATION AND ORIENTATION
Parking located at the interior of blocks, behind buildings or concealed by landscape buffers, provides a more walkable and uninterrupted environment to support transit use.

MODIFY PARKING REQUIREMENTS
Reducing required parking allows a larger proportion of a parcel to be used for redevelopment, increasing the residential and commercial space.

ESTABLISH PARKING MAXIMUMS
Parking maximums can be used to limit the amount of land area devoted to parking capacity by parcel or by district.
ESTABLISH PARKING ACCESS RESTRICTIONS
Reducing parking access to a single curb cut on a secondary street minimizes disruption to the pedestrian environment.

REQUIRE PARKING LANDSCAPE/BUFFERS
Landscape buffers and islands can help to screen parking areas from view and reduce large expanses of impervious surfaces.

INCENTIVIZE SHARED AND OFF-SITE PARKING
Parking resources between adjacent sites can be combined and shared to increase capacity, shared between various uses or combined with on-street parking to be more efficient.
FINANCIAL INCENTIVES

PROMOTE TAX CREDITS
Several types of tax credits - at the federal and state level - offer opportunities that would be applicable to potential redevelopment in the transit nodes.

INVEST IN INFRASTRUCTURE AND STREETSCEAPE
Investments in streetscape and infrastructure are critical to creating a pedestrian-friendly and private investment-friendly environment.

OFFER PROPERTY TAX ABATEMENTS
Property taxes are a component of redevelopment projects that the city can modify to be used as an incentive to encourage specific projects.
OFFER EXPEDITED PERMITS AND APPROVALS
Unpredictable approvals processes become a major impediment to implementing redevelopment improvements. A special expedited review for certain project types can be used as an incentive.

ESTABLISH TARGETED LOAN FUNDS
Targeted and revolving loan funds can be used to provide financial assistance to small businesses within the transit nodes, resulting in improvements and increased activity in these districts.

ESTABLISH GRANT PROGRAMS
Targeted grant programs to improve storefronts in commercial districts are an example of leveraging public funds to incentivize private investment that is aligned with city goals.
