Thriving Cities, Prosperous Countries: From Agenda to Implementation

Ani Dasgupta, Global Director, WRI Ross Center and Coalition for Urban Transitions
There is broad agreement that cities are critical to global goals.
Cities are not on track

*Urban carbon emissions data are not reliable and usually estimated using global GDP, energy and population trends. Global emissions are used as a proxy for illustrative purposes.

Sources: Oxford Economics, 2015; World Bank, 2017; UN DESA, 2014; Angel et al., 2011; UN Habitat, 2016
We need to **bend the curve**

*Urban carbon emissions data are not reliable and usually estimated using global GDP, energy and population trends. Global emissions are used as a proxy for illustrative purposes.*

National, city and wider action is needed

Few countries have national urban plans

Our goal is to help **tip the scale**
TOWARDS A MORE EQUAL CITY

COALITION FOR URBAN TRANSITIONS
A New Climate Economy Special Initiative
World leading organizations coming together
The logic of local and national policy are different.
We need a **wider conversation** among...

- National leaders
- Local leaders
- Civil society
- Private sector
- Multilateral agencies
- Practitioners
- Researchers
Key decision-makers
